

EXP_02. Set up an Azure DevOps project

AIM:

To set up an Azure DevOps project for efficient collaboration and agile work management.

STEPS:

1. Create an Azure account
2. Create the First Project in Your Organization
 - a. After the organization is set up, you'll need to create your first **project**. This is where you'll begin to manage code, pipelines, work items, and more.
 - b. On the organization's **Home page**, click on the **New Project** button.
 - c. Enter the project name, description, and visibility options:
 - Name:** Choose a name for the project (e.g., **LMS**).
 - Description:** Optionally, add a description to provide more context about the project.
 - Visibility:** Choose whether you want the project to be **Private** (accessible only to those invited) or **Public** (accessible to anyone).
 - d. Once you've filled out the details, click **Create** to set up your first project.

[Cancel] [Create]

3. Once logged in, ensure you are in the correct organization. If you're part of multiple organizations, you can switch between them from the top left corner (next to your user profile). Click on the Organization name, and you should be taken to the Azure DevOps Organization Home page.

4. Project Dashboard

5. To manage user stories:
 - a. From the **left-hand navigation menu**, click on **Boards**. This will take you to the main **Boards** page, where you can manage work items, backlogs, and sprints.
 - b. On the **work items** page, you'll see the option to **Add a work item** at the top. Alternatively, you can find a + button or **Add New Work Item** depending on the view you're in. From the **Add a work item** dropdown, select **User Story**. This will

open a form to enter details for the new User Story.

The screenshot shows the Azure DevOps interface for a project named "Smart Health Prediction System". The left sidebar contains navigation options: Overview, Boards, Work items, Backlogs, Sprints, Queries, Delivery Plans, Planning Poker, Pipelines, and Artifacts. The main area is titled "Work items" and shows a list of items. The first item, ID 41, is selected and shows a form to enter details for a new user story.
