

SETTING UP EPICS, FEATURES, AND USER STORIES FOR PROJECT PLANNING

AIM:

To learn about how to create epics, user stories, features, backlogs for your assigned project.

PROCEDURE:

CREATE EPICS, FEATURES, USER STORIES, TASKS

The screenshot shows the Azure DevOps interface for a project named 'Smart Health Prediction System'. The left sidebar contains navigation options: Overview, Boards, Work items, Boards, Backlogs, Sprints, Queries, Delivery Plans, Planning Poker, Pipelines, and Artifacts. The main area displays the 'Backlog' view for the 'Smart Health Prediction System Team'. It shows a list of 11 user stories, each with a title, state (New or Active), and value area (Business). The stories are ordered by priority. A 'New Work Item' button is visible at the top right. On the right side, there is a 'Planning' panel with a 'Sprint 4' summary showing dates (4/17/2026 - 4/29/2026) and effort (0 - 9 working days). A 'New Sprint' button is also present.

Order	Work Item Type	Title	State	Story...	Value Area

1. FILL IN EPICS

The screenshot shows the Azure DevOps interface for a project named 'Smart Health Prediction System'. The left sidebar contains navigation options: Overview, Boards, Work items, Boards, Backlogs, Sprints, Queries, Delivery Plans, Planning Poker, Pipelines, and Artifacts. The main area displays the 'Work items' view for an Epic titled 'Recommendations & Tracking'. The epic is in the 'New' state and is associated with the 'Smart Health Prediction System' area. The 'Description' field is empty, and the 'Discussion' section shows a comment. The 'Planning' section includes fields for Priority (2), Risk, Effort, Business Value, Time Criticality, Start Date, and Target Date. The 'Deployment' section includes a 'Details' panel with a 'Follow' button and a 'Development' section with an 'Add link' button. The 'Related Work' section is also visible.

29 Recommendations & Tracking

No one selected | 0 Comments | Add Tag

State: New | Area: Smart Health Prediction System | Reason: New | Iteration: Smart Health Prediction System\Sprint 3

Description

Click to add Description.

Discussion

Add a comment. Use # to link a work item, @ to mention a person, or ! to link a pull request.

Planning

Priority: 2

Risk:

Effort:

Business Value:

Time Criticality:

Start Date: Select a date...

Target Date: Select a date...

Deployment

To track releases associated with this work item, go to [Releases](#) and turn on deployment status reporting for Boards in your pipeline's Options menu. [Learn more about deployment status reporting](#)

Development

Add link

Link an Azure Repos [commit](#), [pull request](#) or [branch](#) to see the status of your development. You can also [create a branch](#) to get started.

Related Work

2. FILL IN FEATURES

The screenshot shows the Azure DevOps interface for a project named 'Smart Health Prediction Sys...'. The left sidebar contains navigation options: Overview, Boards, Work items, Backlogs, Sprints, Queries, Delivery Plans, Planning Poker, Pipelines, and Artifacts. The 'Work items' section is active, showing a list of items. The main area displays a 'Feature 37' work item titled '37 Improve Model'. The work item is in 'New' state and is associated with the 'Smart Health Prediction System' area. The description field is empty, with a placeholder 'Click to add Description.'. The 'Planning' section shows fields for Priority (2), Risk, Effort, Business Value, Time Criticality, Start Date, and Target Date. The 'Deployment' section has a text box with instructions: 'To track releases associated with this work item, go to [Releases](#) and turn on deployment status reporting for Boards in your pipeline's Options menu. [Learn more about deployment status reporting](#)'. The 'Development' section has an 'Add link' field with instructions: 'Link an Azure Repos [commit](#), [pull request](#) or [branch](#) to see the status of your development. You can also [create a branch](#) to get started.' The 'Related Work' section is empty. The bottom of the interface shows 'Project settings' and a search bar.

3. FILL IN USER STORIES:

The screenshot shows the Azure DevOps interface for the same project. The left sidebar is the same. The main area displays a 'User Story 33' work item titled '33 As a user, I want to view my previous predictions, so that I can track my health status over time.'. The work item is in 'New' state and is associated with the 'Smart Health Prediction System' area. The description field is empty, with a placeholder 'Click to add Description.'. The 'Acceptance Criteria' section has a text box with instructions: 'Click to add Acceptance Criteria.'. The 'Planning' section shows fields for Story Points, Priority (2), and Risk. The 'Classification' section has fields for Value area and Business. The 'Planning Poker' section shows a 'Voted: 0' button. The 'Deployment' section has the same text box as in the previous screenshot. The 'Development' section has the same 'Add link' field as in the previous screenshot. The 'Related Work' section is empty. The bottom of the interface shows 'Project settings' and a search bar.

RESULT:

Thus, the creation of epics, features, user stories and tasks has been successfully created.
